# SOLTIS

## Perform 92

### Main applications

Facade blinds, veranda and glass roof blinds,  
drop-arm awnings and shade sails

### ■ Keeps out up to **97%** of the heat

Soltis Perform 92 acts like a heat shield. Its micro-vents filter the heat, reducing a building's energy costs.

### ■ Glare control

is combined with excellent transparency for better user comfort. Soltis Perform 92's thermal and optical performance earns building certification program points (LEED, BREEAM, Minergie, HQE, etc.).

### ■ High colour resistance over time

Colour is preserved even after several years of exposure (according to the ISO 105 A02 scale).

# 4x

## MORE RESISTANCE

than a standard  
product

The Soltis Perform 92 fabric's resistance delivers longer durability to provide you with better performance over a longer period of time.

# 2x

## THINNER

than a standard  
product

Reduced thickness for enhanced facade appearance and reduced bulk, even with extended blind heights.

### Soltis Perform 92 - 3 key properties

**Dimensional  
stability**

thanks to Précontraint®  
technology

**Easy  
to clean**

**UV  
resistant**

A range of colours  
to match all of your  
projects

The new Soltis Perform 92 range features colours designed by our design office to complement the building's entire environment (joinery, openings and facades). The colours present tones that match the most common colours (RAL and NCS references).

## ■ Exclusive Précontraint® technology

This unique worldwide patented technology consists of maintaining the composite in bi-axial tension throughout the entire manufacturing cycle. It gives our materials outstanding performance, allowing them to surpass market standards in terms of dimensional stability, mechanical strength, coating thickness and flatness.

High tenacity polyester micro-cable reinforcement	①	Superior resistance to elongation and tearing
Coating under bi-axial tension, exerted in warp and weft	②	No deformation during implementation and use
Superior coating at the crest of the wires and anti-fouling surface treatment	③	Superior aesthetic and mechanical durability
Extreme flatness and low thickness	④	Smooth, easy to clean surface with small footprint and easy winding

## ■ Solar and light properties (according to EN 14501)

**TS**: Solar Transmission in %

**RS**: Solar Reflection in %

**AS**: Solar absorption in %

**TS + RS + AS** = 100% of the incident energy

**TV n-h**: Normal Visible light transmission - hemispherical in %

**A**: Aluminium surface exposed to the sun

**B**: Coloured surface exposed to the sun

**g<sub>tot</sub><sup>e</sup>**: External Solar Factor

**g<sub>tot</sub><sup>i</sup>**: Indoor Solar Factor

\* Detailed method  
ISO 52022-3

Takes into account the spectral values of glazing transmission and reflection + blind complex for calculating the solar factor g<sub>tot</sub>.  
Type "D" glazing: insulating double glazing with low emissivity on surface 2 (4 + 16 + 4; Argon filling) g = 0.32 - U = 1.1

# SOLTIS
